PROFILE

Experienced Full stack developer around 2 years of expertise in MERN and MEAN stack development, adept at crafting robust software solutions. Proven track record of delivering high-quality, scalable applications and thriving in collaborative, cross-functional environments. Skilled in independent problem-solving, leveraging MongoDB, Express.js, Angular, React and Node.js for efficient development. Actively seeking opportunities to contribute to dynamic software projects and drive innovation.

SKILLS

- Javascript
- Reactjs
- Redux
- Nodejs
- Angular
- HTML
- CSS
- Bootstrap
- GIT
- mongoDB

TOOLS USED

- Figma
- MongoDB compass
- Visual Studio code
- Postman
- GitHub Desktop

Traning Undergone

- AWS
- Jenkins

Work Experience

ASM Technologies

Aug 2022 to present

- Led end-to-end database design, creating and optimizing stored procedures, functions, and triggers.
- Implemented React, JavaScript for strong client-side validations, elevating user experience and ensuring data integrity.
- Performed rigorous unit and functional testing, promptly resolving issues for top-tier software quality.
- Managed source code processes using GitHub with 95% proficiency, resulting in reduced conflicts, improved code quality, and increased customer satisfaction.
- Applied Agile methodology with 90% proficiency to drive fast, iterative software development, ensuring efficient collaboration, adaptability, and timely delivery of high-quality solutions.
- Updated and managed existing projects while delivering valuable technical support to clients, ensuring smooth operations and maximizing client satisfaction
- Actively contributed ideas and suggestions in team meetings.

Project Experience

React Web Development | Smartfix Tools data handling project

Role : Full-stack developer

- Developed a comprehensive stock maintenance website using React, Node.js, and MongoDB, facilitating efficient tracking and management of inventory.
- Implemented user-friendly interfaces with advanced filtering search options for seamless navigation and interaction with stock data, enhancing user experience and productivity by enabling real-time availability checks.

React Web Development | ruckus project maintenance

Role : Full-stack developer

- Developed a robust dashboard utilizing React.js, Node.js, and MongoDB to manage project work status, data, and detailed information effectively.
- Provided comprehensive tools within the dashboard for overseeing project progress and maintaining vital project-related data.
- Ensured seamless integration of frontend and backend technologies to deliver a user-friendly and efficient project management solution.

React Native mobile app | Sonihul nrg marine app

Role : Frontend developer

- Designed intuitive user interfaces using Figma for a native Android application facilitating seamless Bluetooth Low Energy (BLE) device connections and efficient data transfer.
- Empowered users to effortlessly control and maintain transducer data of machinery through intuitive interface design and seamless Bluetooth Low Energy (BLE) connectivity.

Bhuma Low-code platform

- Developed a user-centric dashboard using a low-code platform integrated with Bhuma and PrestoDB, streamlining the management of user data from SQL databases, ensuring efficient data access and visualization.

EDUCATION

Bachelor of Engineering (B. E), Mechanical **2016-2019**

Dhirajlal Gandhi College of Technology

Diploma in Mechanical **2013-2016**

Thiyagarajar Polytechnic College

Higher Secondary **2013-2016**

Bala Bharathi Matriculation Higher Secondary

Certification

MERN stack developer

kgisl micro college
